

A. Pomerantz & Co.

WE DO IT ALL.

OUR PROJECT MANAGEMENT OPTIMIZES THE EFFECTIVENESS OF YOUR SPACE

Service Disabled Veteran Owned -Certified Minority Owned Business - Small Business

A. Pomerantz & Co. specializes in developing environments to suit the individual needs of every customer. Our team customizes products and services around each customer's desired results while maintaining the basics such as: workspace effectiveness and cost avoidance planning.

Pomerantz assembles a dedicated team specifically for each major account. Our Major Account Teams consist of experts in creating effective environments including Sr. Designers who have at minimum 10 years experience, and our Sr. Project Managers who have over 30 years of industry experience with extensive expertise in coordination and management of large projects throughout the United States.

Our diverse customer base has required our team to provide product and service solutions for a variety of situations. Our capacity to handle large customer projects is apparent through our portfolio of work, but our focus on providing each customer with individualized attention and customized solutions is what sets us apart from the competition.

A. Pomerantz & Co. is the only dealership with a model and mission based on strengthening and maintaining an exclusive customer base - designed to ensure customer satisfaction.

Our national customer base requires Pomerantz to offer flexibility in our vast product and service offering. The aesthetics and functioning of workplaces can vary differently through out the world. If

your goal is to create a dynamic environment for your team we will listen to your desired outcome and we will engineer an effective solution.

A. Pomerantz & Co. is an authorized Steelcase® dealer, representative of over 400 manufacturers globally and provider of an extensive service offering. As a Service Disabled Veteran Owned Company and Minority Business Enterprise, Certified by the NMSDC, we are experts in developing productive and efficient workplace environments for the Commercial Industry, Healthcare, Education, and Government Agencies.

Effectively supporting people, technology, and work processes through workplace design enables companies to control costs and enhance worker productivity – ultimately increasing business results.

Representing over 400 manufacturers

A. Pomerantz & Co. was established in 1888 in Philadelphia, PA founded and operated by the Pomerantz family. Garry Maddox purchased the company in December of 1994. Pomerantz has offices in Chicago, IL and Philadelphia, PA and has sales/account management representatives in Florida, Northern California, Virginia, and Florida.

The longevity of the organization has supported our progression which is dependent on the knowledge and experience of our team. Pomerantz continually enhances our systems and processes by adding technology, industry altering trends, and efficiencies to what is already a fully functioning, effective machine.

Our Team

Pomerantz upholds strong work ethics and maintains a professional and respectful work environment. Our executive team is a dynamic group who understand the significance of integrity in work and in the community and providing our customers with fresh, innovative solutions.

Garry Maddox **Chief Executive Officer**

As Principal and CEO of A. Pomerantz & Co., Garry Maddox provides customers throughout the United States with a dedication to offer the highest quality products and services.

Garry is the recipient of the Rainbow PUSH Coalition & Citizenship Education Fund's Curt Flood Award. The award was presented by Rev. Jesse L. Jackson, Sr., Martin L. King, Esq. and Russell Ewert in recognition of efforts toward "A More Perfect Union: The State of Civil Rights."

The workplace is evolving as quickly as the technology and workforce it supports. Garry and his team bring innovation to workplace environments in support of current goals and challenges such as: Green initiatives, attraction and retention of talent, supporting multiple generations in the workforce, and effective real estate utilization.

During Garry's distinguished 14-year career in major league baseball, he won his first Gold Glove in 1975 which was his first of eight in a row when he was Centerfielder for the 1980 World Champion Phillies team. In 1986 he was honored with the Roberto Clemente Award, given annually to a player who demonstrates the values the Pittsburgh Pirates Hall-of-Famer displayed in his commitment to community and understanding the value of helping others.

Garry is committed to giving back to the community in which he lives and operates his businesses. In 2013, he found Compete 360, a Design Thinking initiative for Philadelphia public schools. In 1997, he founded The Urban Youth Golf Program of Greater Atlantic City, a nonprofit organization that through a volunteer network is tutoring elementary school at risk children while offering the challenge of learning the game of golf. Garry most recently joined the advisory board of ULI (Urban Land Institute). This effort continues to grow in importance to Garry as a mission, as well as the communities his program now serves.

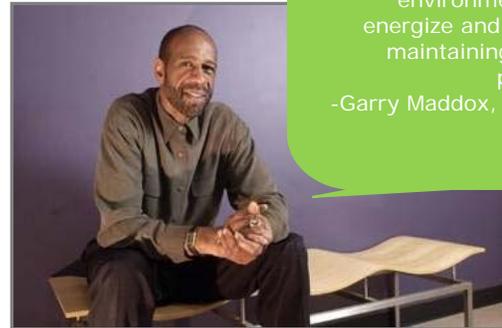

Linda Rudi, Chief Operating Officer

Linda is responsible in the everyday operations of the organization and instrumental in the strategic planning and financial control of the company. Linda is actively involved in key client negotiations and manages the company's manufacturer's relationships.

Linda has created efficiencies and accuracy improvements by integrating improved technology throughout Pomerantz, restructuring the operation of the company by automating ordering, auditing, and accounting processes. Linda's market-segmentation and sales structure created stronger sales and higher customer satisfaction with a leaner & highly productive organization.

In 2001 shortly after joining the organization as CFO, Linda developed plans which turned the company into a nationwide supplier. The organization currently holds national account contracts with multiple Fortune 500 companies.

"At Pomerantz, our mission is helping companies attract customers and retain talented people by creating workplace environments that both energize and inspire, while maintaining our superior performance."
-Garry Maddox, Owner & CEO

The current focus on sales and internal operations is rooted in efficiency, cost avoidance and overall value delivered to the customer. Pomerantz bridges the thoughts and ideas of creative concepts into innovative, relevant results.

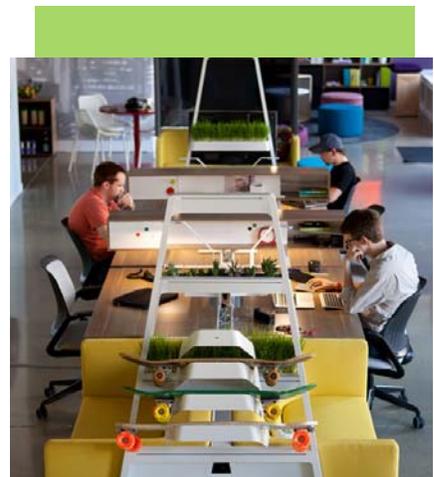

Prior to joining Pomerantz, Linda was an auditor for Ernst & Young, LLP an international public accounting firm. While in the public arena, Linda serviced a variety of businesses ranging from high-growth companies in the entrepreneurial marketplace to publicly and privately held retail, manufacturing, distribution, and service companies.

Garry and Linda oversee the organization on a daily basis. They invoke an open door policy by which any member of the Pomerantz team can discuss a new idea or approach and/or a strategy which would be advantageous to a customer.

Our executive team is active in the execution of account activity and provides oversight of daily operations. Pomerantz enforces an “open-door” policy which enables all team members at any level to quickly resolve an issue by drawing upon the expertise and knowledge of our entire organization.

Knowing our Customer

Our best research, development, and processes are all obtained through listening to our customer’s needs, wants, initiatives, obstacles, history, and future plans. Our process map covers the basic steps, but our customers need individualized attention. Our account managers and project managers spend time developing each schedule and approach for every customer project. The experience of our team enables them to envision possible obstacles, and eliminate risk of error in the pre-planning phase. Once the plans are in place and all communication is clear and concise the work runs smoothly, reducing costs associated with resolution and reactionary activity.

Business Model

In fact we’ve structured our sales, customer service, and marketing approach around listening to our customers. Our company now focuses on a select number of customers in order to provide exemplary service and individualized attention. Each customer has a designated team assigned to develop and maintain each account’s projects and activity. We offer a 24 hour response time for any customer inquiries, requests, and/or concerns. Each primary account has one contact providing our customers with time savings and convenience.

Employee Happiness :)

Ergonomics are essential to our overall well-being. Slouching or improper positioning in your chair can greatly affect your physical health. The configuration of systems, use of natural lighting, and furniture selection not only affect the physical and mental health of the people within the workplace, but also add to the aesthetics and sustainability of the office. Our design team enhances the priorities of the office and finds the most suitable selection of furniture with consideration of the office functions and employee happiness.

Pomerantz now employs research and observation studies to develop environments based on company initiatives, branding, goals for productivity, employee health, comfort and work habits, and the visitor experience. Workplace environments should be customized according to the individual company needs.

Innovation

Pomerantz does represent over 400 manufacturers' products around the world. With the benefits of choice we also offer the research and innovation of all the great minds at each of these companies. We continually reinvent our own processes to adapt to the new trends and technology. We also encourage and promote new innovations designed to benefit our customers whether it be office furniture or new ways of working. Ask about our latest research projects and "behind the curtain" tours.

It's not Value Engineering at Pomerantz

It's about prioritizing. Our designers do not compromise the necessary design features or functional elements which are important to our customers nor do we diminish the integrity of an Architecture & Design Firm's layout and designs. We do provide alternatives to adding what are commonly referred to as "specials". Slight differences in product details from manufacturer to manufacturer can drive up the sell price for multiple dealers or manufacturers resulting in a lopsided bidding procedure.

Pomerantz makes the difference known and will negotiate with manufacturers to find a cost effective way to manufacture the special product, or offer the closest match. If a customer is partial to a product line or manufacturer we can also specify the design to include lower cost items in conjunction with the preferred design elements.

We offer vast amount of products to tailor your workplace to fit the needs of executives, management, end-users, and visitors.

Our team can also develop custom products and furnishings to create a unique experience incorporating brand and culture.

Artistry in creating, developing and inhabiting space

Pomerantz's advanced workspace design process includes utilizing a state of the art design application with full capabilities to layout furniture projects large or small with "Smart object" technology. The program speeds design time and virtually eliminates specification errors. Once the design is finalized, the full project can quickly be rendered in High Definition into a Movie with a "Flythru" Camera or still images.

- Animated movies and realistic stills can be rendered to visualize design concepts
- Eliminate the need for expensive mock-ups and finding space to stage mock-ups
- Share with those who cannot visualize a design
- Generate excitement and acceptance from end-users

We can assist Project Managers, Facility Managers, and the Planning and Design teams by supporting the goals through some of the following areas:

- Incorporating technology such as multimedia displays in workspace and collaboratiive areas
- Utilizing progressive designs and bringing them to reality at multiple price points (establishing budgets, providing various options, and assistance in measuring results)
- Investment in flexible products and configurations to support areas of consistent change
- Entire space analysis to asses challenges (lighting, ergonomics, equipment accessibility)

Easy Being Green

Pomerantz offers the largest amount of sustainable products available. Some fabrics and products offered today are not only constructed of recycled materials, but can now be broken into parts and recycled after use. Long term use of furniture cuts down on waste caused by frequent disposal.

With offices in Chicago, IL and Philadelphia, PA, Pomerantz is one of Steelcase's largest dealerships with LEED AP Certified Sales Representatives and IIDA Certified Designers. As a part of our solution-driven initiatives Pomerantz provides creative disposal services like IRN which makes recycling simpler by sending discarded furniture and equipment to third-world countries to be reused.

All services are managed by an experienced Project Manager who can be contacted for any service requests, questions or inquiries. This complete bundle of services creates a quick and efficient process with one convenient contact. Our comprehensive services reduce cost through a streamlined processes and project management.

Inventory

Always make sure your assets are covered. Bar-coding Asset Tracking is available for inventories which report Cost Analysis, Depreciation, Furniture and Equipment Reuse. Reports are viewed via an exclusive secure website which also offers pictorial catalog. Online service orders can generate move, repair, and/or disposal requests.

The system can automatically analyze the amount of product in the inventory against an AutoCAD drawing and determines what products are available in the existing inventory and what new parts are needed in order to complete a design. Re-use cuts down on unnecessary purchases and disposal.

Rental

Rental is a great service for temporary spaces and spaces which need to be furnished in a hurry. Our rental offering includes high quality furniture with all of the ergonomic features needed for a comfortable work environment. Our Rental furniture can be delivered within a time frame as slim as 48 hours.

Refurbishment and Reconfiguration

Sometimes it's not always best to buy new. Depending on the condition of the used furniture, Pomerantz's Service Team will analyze the cost for refurbishment and/or reconfiguration against a new purchase and determine the cost difference to help customers decide on the best approach to revitalizing and furnishing the office.

Furniture Recycling or Disposal

Pomerantz first determines the recyclable content of the furniture and breaks all items down for separation. Most metal portions of the furniture are easily recycled. Items such as the Think chair are Cradle to Cradle product which means the item is 100% recyclable. Pomerantz assures nothing recyclable is mistakenly disposed of in a landfill. Brokering is also a viable service Pomerantz offers to promote furniture reuse and avoid landfill disposal. Brokering is a great way to help the environment and supplement your new furniture investment.

Reports can be generated to measure the amount of products, equipment, or flooring which was recycled, reused, or disposed.

Moving

Take the time to do it right the first time. The most important focus when planning and implementing a move is to minimize disruption. A move should never impair the productivity of an office. Pomerantz move experts prepare accurate preliminary budgets and oversee the installation to eliminate damages and disruption. Our move project manager acts as a liaison for our customer by frequently communicating with vendors and manufacturers. Our pre-planning and methods minimize disruption, damages, and downtime and bring the best value to our customer's move projects.

Technology: Software & Electronic Capabilities

You can access all information from anywhere at any time. Before you hit the beach, peruse your order status, place an order, check out a drawing, or run a report so you can enjoy the rest of your day with peace and relaxation. Pomerantz has teamed with an IT/Software firm to provide our customers with customized software capabilities.

EDI Billing Invoicing: Electronic transactions speed the ordering process.

Customized Reporting: All reports can be customized to contain all pertinent information in a convenient format. These reports can be delivered via email, posted online, and/or delivered hard copy through any desired delivery service.

Automation of Current Tools and Processes: Customized software programs can be created to interact with our customer's current platform and applications.

Technology Updates: All online tools are hosted on the Pomerantz network enabling software updates and monitoring to occur without interruption or any assistance from our customers.

Design and Rendering: Realistic 3D renderings can be fashioned for any furniture conception or selection. 3D Studio Max including the latest plug-ins is used to create photo-realistic depictions and can be created for an entire office fit-out or limited to an office or workstation. Carpet, windows, curtains, desk accessories are some of the elements which can be added to all rendering depending on the need for detail. This is a fast alternative to preliminary mock-up installations. The renderings are also a great tool for local offices to understand how the company's branding and best practices relate to the office environment.

Online tools: Pomerantz has ecommerce and online tools which can be specifically configured to assist our Customers in all furniture transactions

Our History Founded in 1888

As a Verified Service Disabled Veteran Owned Company, Minority Business Enterprise, Certified by the NMSDC, and Small business, we are experts in developing productive and efficient workplace environments for the Commercial Industry, Healthcare, Education, and Government Agencies.

While many may know Pomerantz from its early roots, the company which was acquired by Garry Maddox in December of 1994, has grown into a preeminent provider of office furnishings and workplace consulting services.

In 2008 Pomerantz opened a Chicago office, located in the Merchandise Mart Plaza and has representatives located throughout the country.

Founded in 1888 by Russian immigrant, Amen Pomerantz, today Pomerantz the company is the trusted source for office furniture products and related workplace services that meet the evolving demands of organizations throughout the United States. With a customer roster that includes large and expanding businesses, as well as Government, Healthcare and University customers, we help organizations adapt to rapidly changing business requirements.

Case Studies

Comcast Cable

A. Pomerantz & Co. is the primary furniture supplier for Comcast Cable nationally. Our company has project managed, furnished and continues to service the Call Center locations throughout the Continental United States.

In 2001 Comcast corporate purchasing began a process to determine what furniture would be best suited for their national call centers. The areas of consideration were the type of work being performed and what features were necessary to maintain a healthy environment. The cost and quality with regard to durability and functionality were main factors in the selection as well. The aesthetics and color schemes were all determined by each individual location.

Pomerantz assisted the Comcast team with the entire process and helped them to develop what they refer to as Furniture Guidelines, which were used within every call center. Comcast's acquisition of AT&T Broadband brought consideration to the decision of implementing guidelines instead of strict standards. Comcast continues to shift into a more standardized program to reduce costs associated with furniture reuse, volume discounting, increased efficiency and aesthetic consistency. A. Pomerantz National Furniture Contract was developed for Comcast in order to maintain consistency from location to location with regard to the pricing and functionality of the furniture.

Our service providers which are located throughout the United States provide us the ability to provide consistent quality of service at every location. The combination of the National Furniture Agreement and the local presence provided Comcast with streamlined purchasing and budgeting without compromising service performance.

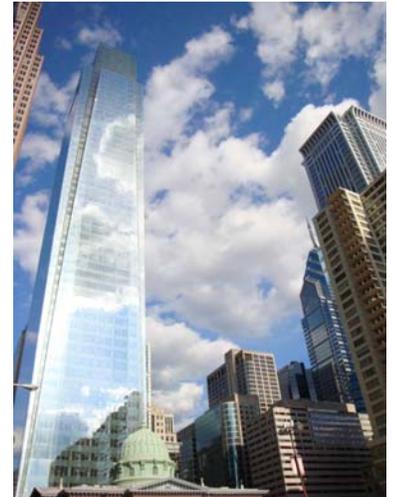

We have simultaneously furnished 25 Call-Center locations throughout the United States and completed 10 Call Centers with an average of over 200 workstations simultaneously with a one year period. The locations were situated all over the country. The larger projects were located in California and the North Eastern United States. We currently provide each location with ongoing services, including but not limited to project management, design, and furniture budget consulting.

Headquarters

In September 2007 to February 2008, Comcast consolidated offices located in the Philadelphia region to their new Comcast Headquarters building.

This was a new construction and high profile project which forever alters the Philadelphia skyline.

Pomerantz managed the Comcast Headquarters project for all private offices and conference seating. Pomerantz delivered everything on a specific schedule developed by Comcast. The Project Manager oversaw the receiving, delivery, installation, and punch-list for 1,131 offices located on 42 floors and 2,200 square feet of conference space. Our experts also provided special services to accommodate tight deadlines. The Project Manager scheduled night deliveries and day-time installation and dock-unload.

Case Studies

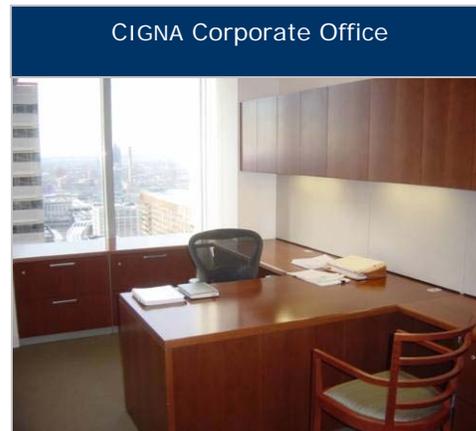

CIGNA

Pomerantz is the national, primary furniture supplier for CIGNA. The global health-service organization has realized the benefits of high-volume contract purchasing in conjunction with local representation. Our dealer alliance partners provide Pomerantz the ability to offer consistent quality in any location throughout the world. In addition to our global dealer alliance, we have sales and account management representatives in Washington, DC, Northern California, Virginia, Florida and offices in Chicago, IL and Philadelphia, PA.

CIGNA has been a Pomerantz customer for well over 10 years.

Working with CIGNA and their A/D consultants, the Pomerantz Design Team developed product specifications,

“typical” standards, furniture plans and

related documentation for office and workspace standards. The Pomerantz team currently services CIGNA throughout the United States providing new furniture and services including: refurbishment, repair, and reconfigurations.

Mesirow Financial

For the first time in its 72 year history, Mesirow Financial, located in Chicago moved its headquarters to a new building. Pomerantz provided and moved over 10 floors of furniture into their new space. The furniture was installed on time and in accordance with the project schedule which called for all installation to be completed after business hours.

Pomerantz worked extensive hours and supplied services on weekends. Various products were installed including Brayton, Vecta, Steelcase, X2 Files, Bernhardt, HBF, Davis, NuCraft conference tables, Cumberland, and Keilhauer.

Project: new headquarters (10 floors of furniture), 2 million dollars, all installation complete after business hours and on weekends.

Product: Brayton, Vecta, Steelcase, X2 Files, Bernhardt, HBF, Davis, NuCraft conference tables, Cumberland, Keilhauer.

“Pomerantz has proven to be an exceptional partner! The team’s creative suggestions and solutions have not only reduced our up-front costs, but continue to provide savings through efficient service and a versatile product offering.

We consider Pomerantz to be a valuable resource..”

*Tammy Bivona
Vice President Facilities Services
Mesirow Financial*

Case Studies

**Mutual Fund Investment Firm
Workplace Consulting**

A large investment firm approached us with a project which included the purchase of all new furniture. Pomerantz as we do with all of our customers met frequently with the customer to learn about their goals, budget and ultimate results pertaining to the project. Our analysis of existing product and the overall goals led us to suggest refinishing their existing product adding enhancements and a reconfiguration.

The end result: we reduced their cost by \$2 million dollars, the aesthetics and functionality were enhanced, the employees thought it was new furniture and the customer was satisfied.
